Planning for the Future: Climate-Adaptive Silviculture

National Silviculture Workshop:
Pre-Workshop Training Opportunity

Overview

Silviculturists are on the front lines of ensuring that forests adapt to climate change. A special pre-workshop training on climate change is available as part of the National Silviculture Workshop. This four-hour training ensures you have up-to-date tools and resources to incorporate climate-adaptive practices into your management decisions. The training will provide silviculturists and other land managers with the knowledge and tools to explictily consider climate change challenges and opportunities in the forests they manage. It will feature innovative silvicultural practices and management strategies to foster resilient stands and landscapes into the future, using applications and lessons learned from the Adaptive Silviculture for Climate Change Network.

Topics Covered

1) Provide training on the ecological impacts of climate change
2) Develop climate-informed silvicultural strategies to meet diverse management objectives
3) Provide decision-support tools for forest management planning under climate change

This training covers the climate change information that is provided as part of the USFS National Advanced Silviculture program, making this information available to those who have not yet participted in the program.

Schedule

When: 1pm - 5pm, July 15, 2024
Where: Olympia Hotel, Capitol Lake, Olympia, Washington, USA
How to Register:

For questions, please contact Maria Vicini at: Maria.Vicini@colostate.edu

This training is supported by the USDA Forest Service. Trainers are affiliated with the Northern Institute of Applied Climate Science, a collaborative, multi-institutional partnership led by the USDA Forest Service.
